

About San Diego (SD01 - Koll) AT&T helps over 1,500 customers operate their business by connecting them to customers, suppliers and partners through our highly secure and reliable data centers. Our data centers provide high bandwidth and low latency connections through the AT&T network, one of the most powerful and advanced IP/Multiprotocol Label Switching (MPLS) networks in the world. For decades, we've helped define how the data center industry operates. With the extensive global coverage at our own data centers (in locations like Amsterdam, London, Hong Kong, Singapore and Sydney) and alliances with other major data center operators, AT&T offers collocation availability at more than 300 facilities in 16 countries.

San Diego County, is a center for innovation with a highly educated workforce, more than 80 academic and applied research institutions, flourishing tourism and an active sea port and naval fleet. AT&T's California data center portfolio includes data centers in Hawthorne, Irvine, San Jose and Redwood City.
