AT&T Data Center Brief

### About Sao Paulo
AT&T helps businesses connect to their customers, suppliers and partners through our highly secure and reliable data centers. Our data centers provide high bandwidth and low latency connections through the AT&T network, one of the most powerful and advanced IP/Multiprotocol Label Switching (MPLS) networks in the world. For decades, we’ve helped define how the data center industry operates. With the extensive global coverage at our own data centers (in locations like Amsterdam, London, Hong Kong, Singapore and Sydney) and alliances with other major data center operators, AT&T offers collocation availability at more than 300 facilities in 16 countries.

Sao Paulo, Brazil’s vibrant financial center, is among the world’s most populous cities, with numerous cultural institutions and a rich architectural tradition. The city is located in Southeastern Brazil, approximately halfway between Curitiba and Rio de Janeiro. The AT&T IDC is conveniently located in the Vila Mariana district, which is part of the area known for it’s economic and tourist facilities.

### LOCATION
- **Rua Aldo de Azevedo, 200 Alto de Pinheiros**
- Sao Paulo, Brazil

**From Airport:** 23 miles* from Guarulhos International Airport
