AT&T helps businesses connect to their customers, suppliers and partners through our highly secure and reliable data centers. Our data centers provide high bandwidth and low latency connections through the AT&T network, one of the most powerful and advanced IP/Multiprotocol Label Switching (MPLS) networks in the world. For decades, we’ve helped define how the data center industry operates. With the extensive global coverage at our own data centers (in locations like Amsterdam, London, Hong Kong, Singapore and Sydney) and alliances with other major data center operators, AT&T offers collocation availability at more than 300 facilities in 16 countries.

The Singapore data center is conveniently located the Viva Business Park located in the eastern part of Singapore. The business park is comprised of three four-story blocks and three eight-story buildings equipped with in-house and lifestyle amenities such as food & beverage establishments, car park facilities, gym and tennis court. The property is well served by mature housing estates with supporting amenities and services such as shopping malls, restaurants, banking, postal and medical services. Viva Business Park is strategically located within close proximity to Changi Airport, Singapore EXPO, and within walking distance from Bedok and Kembangan MRT stations and Bedok bus interchange.

**About Singapore (SNG1)**
