As an enterprise-grade integration platform for mobile messaging, GSMS is a highly secure domestic messaging app, and it also enables global SMS capabilities in over 200 countries. It unlocks a diverse range of use cases for collaboration, productivity, security and compliance for your employees and customers.

Help Customers, Employees and Partners Get The Message

- Two-Factor Authentication using SMS Tokens
- Workforce Tracking and Communication
- HR Functions, Job Placements, Shift Confirmations and Scheduling
- Field Force Safety, Back-to-Base Communication and Escalation Management
- Voting, Polling, Surveys and Sweepstakes
- Appointment and Scheduling Reminders

AT&T Global Smart Messaging Suite allows for organizations to integrate their existing solutions with powerful messaging APIs and send messaging on a global scale.

Features

- Global SMS reach to subscribers in the U.S., Canada and over 200 countries
- Software as a Service (web-based service)
- Cross-carrier messaging
- Two-way highly secure IP messaging for domestic messages
- Enterprise-wide permissions control (hierarchical and multi-workgroup)
- Archival of messaging activity up to 90 days
- Reporting and analysis tools
- Tools to integrate with existing messaging systems and applications
- 24x7 AT&T technical support available
AT&T Global Smart Messaging Suite (GSMS)

Pricing

Set up Charges

$3,300 one-time setup fee includes:

- Setup of the AT&T Global Smart Messaging Suite online account
- Setup and up to 15 weeks’ usage for one AT&T-provided short code (for SMS to AT&T subscribers only, $200/mo code lease charge after first 15 weeks)
- Approval request and setup for U.S. cross-carrier vanity and non-vanity short codes acquired by Customer separately or via Soprano Design at an additional charge

Application Suite Access Charges – $880/month includes 24x7 technical support and access to the AT&T Global Smart Messaging Suite with the following application licenses:

- Web SMS
- Outlook plug-in
- Access to Voice Messaging (additional charges on a per minute basis)

One each of the following:

- Administrator
- Reporter
- eMailer
- API (HTTP, SMPP, SMTP, or WSDL)

SMS: Domestic SMS includes 50 U.S. states and Canada only. Domestic MT/MO price for all messages during a billing cycle is determined by the total number of domestic MT/MO messages used during the billing cycle.

MMS: U.S. only. Not all carriers are supported. Additional terms and conditions apply.

Voice Messaging: U.S. Outbound destinations only. Specifications vary for certain features and file types. Additional terms and conditions may apply.

Options for Acquiring U.S. Short Codes

1. AT&T-only short codes for messaging on the AT&T network only may be leased directly from AT&T pursuant to the applicable terms and conditions.
2. Cross-carrier short codes may be leased from Soprano Design through AT&T

Canadian SMS Short Codes

Canada short codes must be leased from the Canadian Wireless Telecommunications Association (CWTA) [www.txt.ca](http://www.txt.ca). Set up fee is $3,825.

International SMS Codes

International SMS codes (world or local codes) for messaging may be leased from Soprano Designs through AT&T. Set up fees vary by country.

Short Codes & Professional Services Fees

- Monthly leasing fee for each U.S. Standalone SMS cross-carrier random short code (5- or 6-digit number chosen at random) $585/mo
- Monthly leasing fee for each U.S. Standalone SMS cross-carrier vanity short code (5- or 6-digit number chosen by the Customer) $1,165/mo
- Monthly leasing fee for each U.S. MMS with SMS cross-carrier random short code (5- or 6-digit number chosen at random) (Inclusive of MMS service charge of $555) $1,150/mo
- Monthly leasing fee for each U.S. MMS with SMS cross-carrier vanity short code (5- or 6-digit number chosen by the Customer) (Inclusive of MMS service charge of $555) $1,725/mo
- Professional Services for additional assistance with custom setup and integration (provided by Soprano Design) $240/hour for a Soprano Consultant $300/hour for a Soprano Sr. Consultant

All prices are effective October 2016 for new customers only.

Notes
Setup charges are required for initial activation and for any additional cross-carrier short code. Account activation is required to gain access to the AT&T Global Smart Messaging Suite software and user guides and to use the APIs. Account activation and associated monthly recurring charges will occur automatically and immediately when AT&T receives final carrier approval of the Customer’s cross-carrier short code, or after 15 weeks from the time the initial cross-carrier short code request is submitted to AT&T, or upon Customer’s request to gain access to the AT&T Global Smart Messaging Suite software or APIs. Setup fees and recurring charges will continue to apply regardless of whether and when the Customer’s cross-carrier short code is approved for use by other carriers.

At the Customer’s request, AT&T will provide an AT&T-only short code at the time of account activation for interim use by Customer for testing and setup purposes (this AT&T-only code will be available for up to 15 weeks at no charge). Customer may continue to use the AT&T-only short code beyond 15 weeks subject to the applicable monthly recurring charge. Per messages charges and per messages counts are applied when the AT&T-only code will be available for up to 15 weeks at no charge. Customer may continue to use the AT&T-only short code after the date on which it was sent; or (b) received by Customer by means of GSMS or other message that is (a) sent by Customer by means of GSMS from three months after the date on which it was sent; or (b) received by Customer by means of GSMS or other message that is (a) sent by Customer by means of GSMS from three months after the date on which it was sent; or (b) received by Customer by means of GSMS or other message that is (a) sent by Customer by means of GSMS from three months after the date on which it was sent; or (b) received by Customer by means of GSMS or other message that is (a) sent by Customer by means of GSMS from three months after the date on which it was sent.

MMS: MMS messaging only applies to messages sent and received in the U.S. System maximum capacity is 5 messages per second. Excess messages are queued and sent when system capacity permits. Not all carriers are supported. Availability, quality of coverage, and Services are not guaranteed.

Eligibility, Activation and Terms and Conditions: AT&T Global Smart Messaging Suite application (“GSMC” or the “Solution”) is available to AT&T business or government customers (“Customer(s)” or “Customer”) that have a valid, eligible AT&T business/government agreement (“Business Agreement”), and AT&T Foundation Account Number ("FAN") and Corporate Responsibility Users ("CRUs") and CRUs’ allies (“CRUs”) are not eligible. GSMC is subject to Customer’s Business Agreement (including without limitation the Global Smart Messaging Suite Agreement), the applicable voice, data and/or text messaging plan brochures (including without limitation the Enterprise Customers Additional Service and Equipment Related Terms found at att.com/abs-additl-terms) and coverage maps, and the AT&T IP Messaging Feature is subject to the End User License Agreement (“EULA”) found at [http://smartmessagingsuite.com/terms/GSMS_app_eula.pdf](http://smartmessagingsuite.com/terms/GSMS_app_eula.pdf). Customer must have a physical address within AT&T’s licensed service area. Individual wireless service agreements for Customer’s end users may also be required. GSMC cannot be self-provisioned (e.g. through Premium) and must be provisioned and de-provisioned by an AT&T enterprise sales representative. AT&T will designate a Customer FAN to which AT&T billing will bill all GSMC charges. If such FAN is suspended or cancelled, all GSMC provisioned through such FAN will be disabled. Additional hardware, software, subscription, Internet access from a compatible PC or smartphone and/or special network connection is required. May not be available for purchase in all sales channels or in all areas. Emergency Notification: GSMC must not be used as the primary or sole method of sending notifications that contain information that is essential to the protection of life or property. First responders should not rely on GSMC for such situations, in such situations GSMC may be more susceptible to blocking, outages, delays and congestion, and greater risk of non-delivery.

Short Codes: Approval of a Customer’s Common Short Code (“CSC”) from the relevant carriers is required for both U.S. and Canada cross-carrier SMS messaging from GSMC. Customer must provide its own registered cross-carrier CSCs. Submitting a request for carrier approval of a CSC does not guarantee that a participating carrier will accept or implement the CSC or that Customer will be able to use the CSC at all. Carrier CSC approvals can take up to 12 weeks or longer, and will vary according to the time required to secure Customer’s CSC approval from each desired carrier. AT&T makes no guarantees as to the timing of receipt of any carrier’s CSC approval.

Non-AT&T Devices/Service: With respect to each text message (“SMS”) that Customer sends to an end user with a non-AT&T device/service, Customer is responsible for ensuring that Customer’s and its applicable end users’ use of GSMC complies with all applicable terms of service of such other wireless carrier(s). All associated voice, messaging, and data usage will be subject to the applicable rates and terms of such other wireless carrier(s). Refer to applicable wireless carrier for such rates, terms, and conditions.

24x7 technical support for GSMC is provided by AT&T. For users of non-AT&T devices, all technical support, voice, messaging, and data usage will be subject to the applicable rates and terms of such other wireless carrier(s). Refer to applicable wireless carrier for such rates, terms, and conditions.

Sending and/or Receiving Messages: GSMC requires internet access to access the Messaging Portal or the Plug-ins, Protocols or APIs used by any Customer application that connects to GSMC. AT&T has no liability to Customer for its inability to access the Messaging Portal or GSMS for reasons beyond AT&T’s control. GSMC may only be used to send messages to end users who have given Customer permission to send them messages. All messages are attempted to be sent but GSMS may remove any non-supported, restricted, blocked or unavailable wireless phone numbers or devices served by AT&T or any other wireless carrier, such messages will not be delivered. AT&T may delete any SMS or other message that is (a) sent by Customer by means of GSMC from three months after the date on which it was sent; or (b) received by Customer by means of GSMC from twelve months after the date on which it was received. Customer is responsible for managing, maintaining, monitoring, securing and collecting information regarding device distribution lists used in GSMC. AT&T’s privacy policy may be viewed at [http://www.att.com/online/privacy/policy/pdfs/202.pdf](http://www.att.com/online/privacy/policy/pdfs/202.pdf). It is the end user’s responsibility to ensure his/her use complies with Customer’s internal IT and security procedures. Customer is responsible for ensuring accurate phone numbers are entered into the GSMS address book and group distribution lists, and Customer is responsible for removing any unwanted phone numbers from GSMS address book and group distribution lists. A sender is solely responsible for content of its sender transmission through GSMS, and Customer is responsible for safeguarding its access to its GSMS. For example, such safeguarding includes, but is not limited to, protecting its account information, the numbers using a firewall, and for implementing anti-virus, anti-spyware or similar protective measures, all at Customer’s sole cost and expense. Customer must take all reasonable steps to ensure that the password and username of all users authorized by Customer are not disclosed to a third party or compromised in any way. Use of GSMS is subject to the AT&T Acceptable Use Policy, which can be found at www.att.com/aup. The sender may not use GSMS to transmit any communication that would violate any federal, state or local law, court order or regulation, Customer and its end users must cooperate with AT&T and/or governmental authorities in investigations alleging a violation or prohibited use of GSMS.

International Messages: Approval of a Customer’s International Code from the relevant carriers is required for International Messaging using GSMS. Submitting a request for carrier approval of an International Code does not guarantee that a participating carrier will accept or implement the International Code or that Customer will be able to use the Code at all. Carrier approvals can take up to 12 weeks or longer, and will vary according to the time required to secure Customer’s International Code approval from each desired carrier. AT&T makes no guarantees as to the timing of receipt of any carrier’s approval. A complete list of supported destination countries and carriers can be provided by AT&T; contact your AT&T sales representative to request a copy. A compatible device is required to receive individual message sent to each recipient. Any unused messages in any billing month will not carry over to the next month. Changes to Customer’s pricing plan will not take effect until the beginning of the next billing cycle. All prices herein exclude applicable taxes and fees.

AT&T Global Smart Messaging Suite comes pre-configured with one or more application licenses, including WebSMS, which enables outbound SMS, eMailer+, which enables advanced e-mail tracking, Reporter, which enables historical and performance reports, and API licenses, which enables setup and integration with existing company systems.

Customers have the option to archive messages within the web application for up to 90 days, after which the messages will be deleted. Customer may export messages for Customer retention offline, if they are exported before deletion.

For non-AT&T devices, all technical support, voice, messaging, and data usage are subject to the applicable rates and terms of such other wireless carrier(s). Refer to applicable wireless carrier for such rates, terms, and conditions.

All cross-carrier short codes and related Professional Services are subject to Soprano’s Design’s and conditions and found at [http://smartmessagingsuite.com/terms/GSMS_short_code_registration_terms.pdf](http://smartmessagingsuite.com/terms/GSMS_short_code_registration_terms.pdf).

Details about AT&T sales representative to request a copy. A compatible device is required to receive individual message sent to each recipient. Any unused messages in any billing month will not carry over to the next month. Changes to Customer’s pricing plan will not take effect until the beginning of the next billing cycle. All prices herein exclude applicable taxes and fees.
Limitations and Disclaimers: The maximum number of characters of one standard SMS message is 160. Messages will be sent in two or more parts if the characters exceed 160. Cellular coverage is not available in all areas. Due to cellular coverage and system limitations, GSMS may not be accessible at all times. AT&T wireless coverage maps are available at wireless.att.com/coverage. Non-AT&T devices/services are not covered by the AT&T networks and additional terms and conditions may apply (refer to your wireless carrier). Coverage is subject to transmission limitations and terrain, system, capacity, and other limitations. AT&T does not guarantee the availability, security, reliability, speed of message delivery, or timeliness of message delivery of GSMS, and AT&T makes no Service Level Agreements (SLAs), guarantees or warranties with respect to the performance of GSMS. Delivery time is dependent upon the conditions prevailing at the time of submission and actual delivery and/or delivery within a specific period of time are not guaranteed. When outside coverage area, access will be limited to information and applications previously downloaded to or resident on the device. Messages may not be successfully terminated, or terminated in a timely manner, on an end-user’s handset (including messages sent to mobile phones with end-users subscribed to international telecommunications carriers). This could be due to, for example, the end-user’s handset not working properly, being switched off or out of range, the message storage space on the end-user’s handset being full or where an end-user is overseas and the international telecommunications carrier has blocked a message from GSMS. Other messages sent for conversion into text messages (SMS) for delivery to end-users may not be converted and delivered. This could be due to, for example, a problem with the end-user’s Internet connection or e-mail gateway, a problem with the AT&T network, or the end-user not having sufficient credit to send a message or not having the correct permissions to send a message. AT&T has no defense, settlement or other obligation or liability from the actual or alleged infringement of intellectual property based on the Solution, including the AT&T IP Messaging feature.

Third-Party Products and/or Services: Customers may purchase GSMS as an AT&T only solution providing messaging on the AT&T network only without separate agreements with third parties. If Customer requires professional services or wishes to deploy cross-carrier or non-U.S. messaging to non-AT&T subscribers, then the complete solution will require third-party products and/or services, such as leasing cross-carrier CSCs, that are subject to applicable third-party terms and conditions and may require separate purchase from and/or agreement with the third-party supplier. If Customer selects optional billing by AT&T for CSCs leased and/or professional services provided by Soprano Design, Customer will be subject to the terms of the Alliance Billing Service Attachment found at https://www.wireless.att.com/businesscenter/en_US/pdf/Regulatory%20Affidavit.pdf. By using this GSMS, you agree to abide by the terms and conditions of any applicable third-party software licenses for products and services. Failure to comply with such terms and conditions may result in GSMS termination.
