Organizations can now deploy an advanced broadband push-to-talk (PTT) solution that mirrors the One-Touch operation of a traditional radio. Today, governments need an affordable solution that enables fast, responsive mobile communications combined with the familiarity of Land Mobile Radio (LMR).

**AT&T Enhanced-Push-to-Talk App**

**Land Mobile Radio (LMR) Version**

**Connect, communicate and collaborate in a powerful new way**

**Next generation AT&T Enhanced Push-to-Talk with the simplicity of a two-way radio**

All-in-one interface for quick and easy access

- Added simplicity, speed and clarity
- Greater convenience, connectivity options and control
- User interface designed around group calling

Introducing the LMR version of the AT&T Enhanced Push-to-Talk client application

Agencies everywhere can complement their two-way radio communications with AT&T Enhanced Push-to-Talk. And with optional IP Interoperability, Enhanced Push-to-Talk users can communicate directly with existing two-way radio talkgroups over compatible 3G, 4G, 4G LTE and Wi-Fi networks.
AT&T Enhanced Push-to-Talk gives your agency a powerful new way to boost communications and improves the safety of your community. Take a quick look at the many ways you can empower first responder communications.
