

Network Integration Solutions

Africa, Asia Pacific, Canada, Europe, Latin America, Middle East and North America

Let AT&T's team of dedicated, global networking experts deliver technology leadership targeted at your business challenges. Our network experience along with world class business partners and agents all combine to help you achieve reach and scale around the globe. Our collaborative scope of work based approach as an integrator enable a better return on investment (ROI) and total cost of ownership (TCO), regardless of your business challenge.

Maximizing Customer Return on Technology by Extending our Portfolio

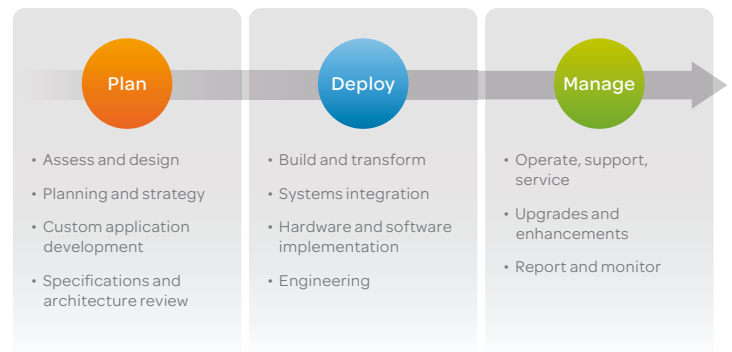

AT&T offers a robust global, customer-centric approach to integrated network solutions across voice, data and IP infrastructures. As your integrator, AT&T becomes your general contractor that supplements our leading network services portfolio while integrating technologies and services from other service partners, platform providers and carriers. We deliver the cost effective, vendor neutral solutions that meet customer requirements and integrate their network and applications.

We bring technology solutions, expertise and resources in support of your changing business needs and challenges:

- Business Optimization
- Multicarrier Servicing and Management
- Emerging Technologies
- Integration of services due to Merger and Acquisition Activity
- Network and IT Convergence
- Outsourcing/Out-tasking

We can assist you at any phase of your network evolution. In addition to program management and execution of solutions for these challenges, AT&T will design and build all or part of your network solution, minimizing your risk and optimizing chances for success.

Network Integration Solutions

The AT&T team can support the assessment, planning and design of your standard or custom solution with proof of concept testing and application readiness, prior to deployment. After deployment, our team of experts is available to service, maintain and manage your network environment based on the level of need.

Service Areas of Focus include AT&T or client-owned Internet Data Center (IDC), Cloud based Solutions, IP/Technology Transformations and Refresh, Network Security, Voice/Video Transformations, Carrier Aggregation, Voice over IP/IP Telephony, Wireless LAN, Digital Signage and Virtual Desktop Infrastructure.

An Experienced and Highly Skilled Team

AT&T's skilled Engagement and Program Managers have in-depth consultancy and industry experience and are able to quickly relate technology solutions to your business challenges. Over 50% of the AT&T team has at least one technical certification in the areas of IT, PBX/IP Telephony, Networking, Security and Wireless along with project management and business certifications supporting platforms and technologies from leading IT performance vendors.

Emerging Technology Solutions	<ul style="list-style-type: none"> • Instant Messaging/Presence • Virtual Desktop Infrastructure 	<ul style="list-style-type: none"> • Machine to Machine Solutions • Unified Communications

AT&T assessed the LAN infrastructure for a global manufacturer and proposed an upgrade to the existing networking. The design utilized MPLS to simplify the network, ensure performance for new applications, and support a vendor agnostic IPT implementation. The AT&T team performed the assessment, designed the architecture, ordered, staged, configured, tested and installed the solution. The manufacturer now boasts a state-of-the-art IP Telephony environment and a 20% savings.

Global Thinking, Local Execution

Our solutions are designed to meet your goals of global consistency and control over your network and IT environment. With our local relationships we can help establish an infrastructure to your company's standards and policies on a national or global scale. Global companies have diverse needs with multilingual workforces, making it critical

to have internationally experienced consultants that understand the business culture and speak the local language.

- Americas: French, Portuguese and Spanish
- Asia-Pacific: Cantonese, Japanese, Korean, Mandarin and Hindi
- EMEA: Dutch, French, German, Italian and Spanish

Strategic Solutions

By offering integrated, global, end-to-end services, solutions and support, AT&T provides a single point of contact and accountability that mitigates risk and ensures well managed implementations. Our solutions provide customers with a clear ROI/TCO and offers enhanced performance, integration, control and security.

The scale, breadth and reliability of our diverse service portfolio, coupled with those of our pre-selected business partners, will deliver cost efficiencies and competitive advantages you can utilize anywhere around the world.
