AT&T Fleet Complete

AT&T Business

AT1+ Asset Trackers

One of the most cost-effective equipment trackers on the market, AT&T Fleet Complete's AT1+ Asset Trackers offer complete visibility over your high-value assets in the field. Monitor the location and status of your equipment, trailers, and machinery in near real-time, all from your desktop or mobile device. AT1+ devices run on the LTE Cat-M1 network, bringing you faster status transmissions and a reliable service.

AT&T Fleet Complete's asset trackers offer mission-critical visibility without the need for onsite supervision. Remove the guesswork from managing multiple assets, and empower your team to focus on customer service and expanding business opportunities.

Cost Effective Solutions for Everyday Applications

Asset and sensor monitoring solutions help customers manage maintenance and performance across assets to improve costs and efficiency.

Reports an asset's location multiple times per day and shows where the asset has been during a specified time range.

Fleet Complete offers both solar and battery-powered asset tracking devices.

Innovative Solutions for Diverse Business Needs

Construction Services

Minimize instances of lost or stolen loading trailers, bobcats, generators and other machinery.

Paramedic & EMS Services

Receive instant notifications of high-value tools left behind.

Transportation

Monitor the location and arrival/departure of trailers.

Trade Services

Ensure all your high-value tools are never forgotten onsite.

Better Asset Maintenance

Accumulated engine hours, operating hours or miles towed can be used in setting maintenance schedules. These also can be used in monitoring ‘in-warranty’ time.

Track Asset Utilization

Track location and utilization of assets based on their time in operation or on total engine hours or operating hours.

Robust Security and Remote Updates

End-to-end encryption during data transfer to the cloud and over-the-air updates to keep devices current with access to the latest features and functionality.

Both the AT1H+ and AT1S+ offer the same core features

1 **Future-Proof Device**
The device runs on the LTE Cat-M1 network and receives automatic software updates over the air.

2 **Complete End-to-End System**
The solution includes a device, cloud IT, applications, data security, connectivity and customer support.

3 **Easy Installation**
Using glue, double-sided tape, or screws, the device is quick to install on any type of outdoor asset.

4 **Rechargeable Battery**
The AT1H+ is hardwired and recharged when exposed to power. The AT1S+ can recharge its battery when exposed to direct sunlight.

Dedicated Support for a Seamless Setup

AT&T Fleet Complete's professional support team simplifies the setup process. Combine custom training sessions with resources, videos, and tips to get the most out of your solutions. We’ll also help you expand your capabilities as your business grows. For seamless self-installation and troubleshooting, download the free FC Install App. Available for Android and iOS devices.

Why AT&T Business?

Connect people, devices, applications, and more to our secure and reliable network to unleash the power of your data. Let our experts work with you to solve your IoT challenges and accelerate outcomes. Your business deserves the AT&T Business difference—a new standard for networking.
