Payphone Telephone Access Service (PTAS)

Service Description

AT&T Payphone Telephone Access Service (PTAS) provides independent payphone providers with basic access to the AT&T network.

PTAS lines provide payphone operators access to the AT&T network for the completion of calls from public telephone sets. PTAS includes special blocking and control features to your access lines, providing control over the types of calls made using your sets.

With PTAS access lines, rates and intelligence must be provided within your payphone set. By using intelligent sets, you have greater flexibility and control over the features and rates provided by your individual payphone lines.

Operators of fifteen or more AT&T Payphone Telephone Access Service lines can also benefit from our PSP Reward Plan, which offers discounts to Payphone Service Providers (PSPs) who commit to maintain service for a minimum time period.

Benefits

Payphone Telephone Access Service provides larger payphone providers with a basic coin telephone access line with the screening and blocking features they need.

PTAS is our most popular service, and for good reason. Although initial capital expenses are higher, PTAS gives you greater flexibility because all features are controlled within your set.

Service Design

AT&T PTAS service is provided with the screening and option features that you need. Once you've selected AT&T PTAS, the next step is to decide how your lines should be provisioned. Your choices include:

- Several call blocking options (including 976 calls, 900 calls, and international calls)
- Call screening options (such as "no third party billing" to your payphone)
- Touchtone

AT&T PTAS lines are offered in a number of different pre-defined configurations that allow you to choose the call blocking and screening features that fit your needs.

Availability & Pricing

AT&T Payphone Telephone Access Service is available ubiquitously throughout the nine-state AT&T region.

PTAS service has a different pricing structure depending in which state it is being ordered. Rates and conditions can be found in Section A7 of AT&T's General Subscriber Services Tariff (G.S.S.T.) for the applicable state.

Payphone Service Providers (PSPs) with at least 15 payphones in a state can qualify for discounts of up to 20% off tariffed PTAS rates under AT&T PSP Reward Plan.

With Reward Plan, PSPs receive a discount based on the number of PSP access lines subscribed to the AT&T PSP Reward Plan and the term commitment agreed upon. The rates for access line service are stabilized under the plan for the term of the agreement and these lines will be exempt from Company initiated increases. As a bonus, decreases in the access line charges that are initiated by the Company will be passed along to the subscriber.

Ordering

PSPs interested in ordering PTAS service should contact the Payphone Service Provider Service Center (PSPSC). The PSPS serves as a single point of contact for

Payphone Service Providers (PSPs), providing ordering, provisioning, and billing for AT&T Payphone Telephone Access Service (PTAS).

After your PTAS lines are installed, AT&T's Payphone Service Provider Repair Center (PSPRC) will provide you with a dedicated service center for resolving any problems you have with your lines.

The PSPRC serves as a single point of contact for the receipt of trouble reports from payphone providers. The center is responsible for testing analysis and resolution of all PSP provider repair activities.

SmartLine® Service

SmartLine service is a central office based, network platform. With SmartLine service, the central office provides features and functionality to the payphone stations, including coin signaling and supervision, long distance call rating, in addition to the basic screening and blocking features provided with PTAS service.

BellSouth SmartLine service provides Independent Payphone Providers enhanced access to the BellSouth network.

- With SmartLine service, the central office provides features and functionality to the payphone stations, including coin signaling and supervision, long distance call rating, in addition to the basic screening and blocking features provided with PTAS service.
- BellSouth SmartLine service offers payphone operators the advantages of automatic network updates, reduced payphone set costs, and hassle elimination.

Benefits

BellSouth SmartLine service is a good choice if you're looking for a hassle-free way to operate a smaller number of payphones. And because you can match "dumb" payphone sets with the service, it reduces your upfront costs and your exposure to lost revenue due to set damage. This platform provides the "smarts" to your "dumb" sets.

Service Design

BellSouth SmartLine service automatically updates network changes, such as area codes, local exchanges or local rate changes. Your phones are automatically updated promptly, and without extra maintenance.

BellSouth SmartLine service also provides additional "smart" features above those provided in PTAS service. Added features include:

- Coin signaling and supervision
- Automatic network changes
- Long distance call rating

And like PTAS service, you can select from a number of available feature sets to setup your lines with the screening and blocking features you want.

Automatic Network Changes: SmartLine service automatically implements network changes, such as area codes, local exchanges or rate changes, saving you the hassle and cost of providing maintenance.

International Call Blocking: SmartLine service helps you secure payment for the initial period before overseas calls are made. This optional feature blocks direct dialed international calls. Additional 900 and 976 screening features are also available through the switch.

Answer Detect: You can reduce coin loss (and unhappy customers) by giving the BellSouth operator a way to return the lost coin by sending an electrical signal over the network.

Availability & Pricing

BellSouth SmartLine service is available throughout the nine-state BellSouth region.

The pricing structure of SmartLine service varies by state. Check Section A7 of BellSouth's General Subscriber Services Tariff (G.S.S.T.) for pricing, terms and conditions of SmartLine service in the applicable state.

Ordering

Payphone Service Providers interested in ordering SmartLine service should contact the Payphone Service Provider Service Center (PSPSC). The PSPS serves as a single point of contact for Payphone Service Providers (PSPs). Ordering, provisioning, and billing for BellSouth SmartLine Service are provided through the PSPSC.

After your SmartLine service is installed, BellSouth's Payphone Service Provider Repair Center (PSPRC) will provide you with a dedicated service center for control and maintenance of your service.

The PSPRC serves as a single point of contact for the receipt of trouble reports from payphone providers. The center is responsible for testing analysis and resolution of all PSP provider repair activities.

PSP Reward Plan

Description

PSP Reward[SM] Plan is a state-specific pricing plan that provides discounts of up to 20% off tariffed rates for Payphone Telephone Access Service (PTAS) lines.

Reward Plan offers a discount over normal access line rates. The discount applied will be based on the number of PSP access lines subscribed to the PSP Reward Plan and the term commitment agreed upon.

In addition to discounts off tariffed PTAS line rates, Reward Plan subscribers lock in the rates for a term period. The rates for access line service are stabilized under the plan for the term of the agreement and these lines will be exempt from Company initiated increases. As a bonus, decreases in the PTAS access line charges that are initiated by the Company will be passed along to the subscriber, however. However, any rate decreases will be applied automatically.

(Not Available in GA, KY, or SC)

Program Requirements

The key requirements for participation in the PSP Reward Plan are:

1. Qualify with a minimum number of access lines committed to the plan (as few as 15 in a state)
2. Agree to send all 0+ local and intraLATA calls (not previously incumbered as of the effective date of the tariff) to . These calls must:
    - originate from a telephone line associated with the subscribing PSP's account
    - originate and terminate in the same LATA (intraLATA)
    - be carried and completed by via facilities and billed by .

Discount Rates

The Discount rates (reaching up to 20%) vary by state and the commitment level. For more information, see Section 7.4 of the General Subscriber Services Tariff for the applicable state.

Ordering

To sign up for the savings offered under the PSP Reward Plan, contact your PSP Account Team member.

Note: The ®PSP Reward℠ Plan does not apply to the ®SmartLine®service or inmate lines. ®SmartLine®service access lines do not apply toward the line count used to determine the discount level.

(Not Available in GA, KY, or SC)

AT&T 1+ IntraLATA MTS Service

Service Description

AT&T 1+ IntraLATA Message Rate Telecommunications Service (MTS) provides basic intraLATA toll service with minutes of use rates based on state and FCC tariffs.

Whether you have 10 payphones or 10,000, AT&T Interconnection Services' 1+ IntraLATA toll services work for you.

MTS is available for 1+ IntraLATA service for calls originating and terminating in the same state and the same Local Access and Transport Area (LATA). When you sign up for MTS, AT&T provides your payphones with a premium IntraLATA toll service, at truly competitive rates.

Payphone Service Providers with qualifying call volumes can get even better rates with AT&T 1+ IntraLATA WatsSaver service.

Benefits

AT&T 1+ IntraLATA Message Rate Telecommunications Service (MTS) is the IntraLATA toll service from the company you trust. With extensive coverage and a highly reliable network, you'll be free from worry with our service.

MTS provides your payphones with a premium IntraLATA toll service, at truly competitive rates.

BellSouth 1+ IntraLATA WatsSaver service provides Payphone Service Providers (PSPs) a discount on 1+ IntraLATA charges based on term and volume. Payphone Service Providers who commit to a term agreement of between 12 and 36 months receive discount pricing.

PSPs who commit to a minimum term period and who meet the minimum volume (in minutes of use) save on outward dialed station-to-station calling, automated or operator assisted Calling Card, station-to-station, person-to-person or collect calls which are billed to the customer's account.

The WatsSaver plan is based on a flat, per-minute rate, which varies by state. A 30-second initial call minimum applies.

Availability and Ordering

AT&T 1+ IntraLATA Message Rate Telecommunications service is available throughout the AT&T region.

Rates for MTS are based upon the usage level and are state specific. For rate detail and information on terms and conditions, see Section A18 of the AT&T General Subscriber Services Tariff (G.S.S.T.) for the applicable state.

Payphone Service Providers who commit to an extended service term of between 12 and 36 months receive discount pricing. AT&T 1+ IntraLATA WatsSaver service is a special

term and volume discount plan specifically designed to help Payphone Service Providers (PSPs) with lots of high-volume phones realize greater savings.

PSPs interested in having AT&T 1+ IntraLATA Message Rate Telecommunications service and/or WatsSaver service should contact the Payphone Service Provider Service Center (PSPSC). The PSPS serves as a single point of contact for Payphone Service Providers (PSPs), providing ordering, provisioning, and billing for MTS and WatsSaver.

AT&T 1+ IntraLATA WatsSaver® Service

Service Description

AT&T 1+ IntraLATA WatsSaver service is a special term and volume discount plan specifically designed to help Payphone Service Providers (PSPs) with lots of high-volume phones realize greater savings.

WatsSaver service provides PSPs a discount on 1+ IntraLATA charges based on term and volume. PSPs who commit to a minimum term period and who meet the minimum volume (in minutes of use) save on outward dialed station-to-station calling, automated or operator assisted Calling Card, station-to-station, person-to-person or collect calls which are billed to the customer's account.

Note: A 30-second initial call minimum applies.

Benefits

AT&T 1+ IntraLATA WatsSaver service provides Payphone Service Providers with large volumes of IntraLATA toll minutes, a discount off standard IntraLATA toll rates.

The combination of WatsSaver service with AT&T 1+ IntraLATA Message Rate Telecommunications service means your customers will receive the highest quality IntraLATA toll service — and you save.

And because the discount is based upon the term you commit to and the volume of calls, the savings can grow with your business. Best of all, with our regional aggregation of usage, its easy to qualify.

Availability and Ordering

AT&T 1+ IntraLATA WatsSaver service is available in all nine states. The plan is based on a flat, per-minute rate, which varies by state based on the call location.

Because WatsSaver service is calculated using aggregation at the regional level, it's even easier to qualify. Your WatsSaver service discounts will be based on a blended average of rates across each state, as well as by the term of individual contracts.

For more information about our 1+ IntraLATA toll services, please contact your dedicated AT&T PSP Service Center representative at 1-800-786-7619. WatsSaver service is filed in the General Subscriber Services Tariff (G.S.S.T) in Section 18.
