

# Managing your mobile business made simple

Elevate your fleet operations with a secure and flexible platform

AT&T Fleet Complete is your telematics platform to improve fleet operations. Its fully integrated suite of tools allows you to easily manage your vehicles, deploy and access dash camera footage, and locate your mobile assets like generators or toolkits.

Our solution enables you to monitor your drivers to help improve safety—theirs and the public, and to reduce business risks. Some insurance companies will even lower your premiums when you add a telematics solution.

These tools connect in one easy-to-use platform, Fleet Complete Hub. This delivers intuitive, real-time insights on the performance and status of drivers, trucks, vehicles, heavy equipment, and all other moveable assets.

#### **Fleet Complete Vehicle Tracking**

Connect your vehicles with GPS fleet trackers for real-time insights into your vehicle operations, such as location, engine hours and fuel consumption.

#### **Fleet Complete Vision**

Al-powered video telematics that help lower insurance premiums and help save on fuel and maintenance while improving public and driver safety.

#### **Fleet Complete Asset Management**

A durable telematics device that easily tracks your assets and offers precise insights to help protect equipment from loss, theft, and misuse.

## **AT&T** Fleet Complete

## Make the connection for safety

Fleet Complete Hub gives you the flexibility to only add the telematics tools you need.

- Reports for distance, trip, driving, speeding, idling, stopping, geofencing, fuel consumption, and more
- Insights into scheduled maintenance, engine codes, and idling can help reduce vehicle downtime and maintenance costs
- Real-time monitoring uses easy-to-understand status, color coded geofences, categorized Electronic Control Module (ECM) data, and point-of-interest names instead of addresses
- Rules to alert or log common situations such as arrival, departure, speeding, harsh braking or cornering, or engine over RPM
- Enable real-time driver coaching and access data driven fleet and driver safety reports to proactively monitor progress
- Report on use, location and operation hours for equipment in the field to optimize your total cost of ownership (TCO)

### Download the mobile app

Fleet Complete Hub provides easy-to-use web and mobile interfaces, making it easy for you and your team to run your business.

Benefits after effective deployment

15 to increase in vehicle utilization\*

15 increase in productivity
